

NEW PRODUCTS COMING SOON

Cultured Stone is excited to share a preview of new product introductions slated to release in late 2022.

INTRODUCING TENLEY BRICK™

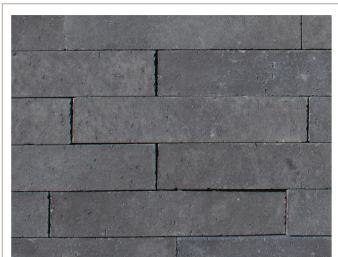

Developed in close collaboration with a community of architects, designers, and builders, Tenley Brick enhances the clean-cut shape of a linear brick with contemporary colorways for unparalleled versatility in a broad range of applications. This profile boasts simple, slender, lengths and natural textural details with defined edges.

In contrast to more tumbled rock surfaces that call back to the old-world character of more traditional structures, the clean lines of Tenley Brick are intricately fashioned for more contemporary applications, drawing attention to the horizontal and vertical layout along the wall. Its sleek silhouette provides specifiers with dynamic potential, to explore unique bond and patterning options.

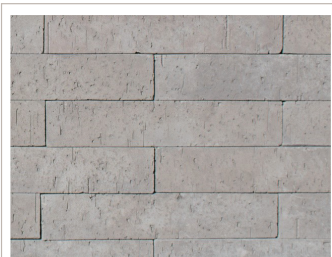

This profile can be installed using a drystack technique or a grouted finish.

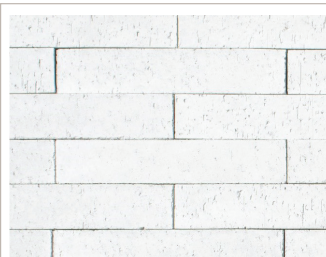

A variety of neutral color gradients incorporate subtle tonal transitions for an expressive aesthetic that feels both contemporary and organic.

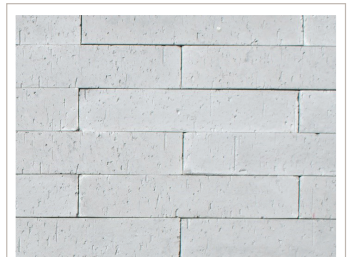

NORI™
TENLEY BRICK

WILDON™
TENLEY BRICK

LOFTEN™
TENLEY BRICK

KULLEN™
TENLEY BRICK

DIMENSIONS: 2.25" H X 10.5" W
